WE CREATE BEST PRODUCTS
DUE TO OUR PASSION TO CARS
WITH OUR EXPERIENCE
AND NOVEL TECHNOLOGIES

INITIAL CLEANING

EFFICIENCY AND SAFETY

Pre-washing removes superficial dirt, dust, road salt and slush, which could damage the paint during manual washing. The advantage of pre-cleaning is the effective softening of dirt and lifting them on the surface of the foam, which stick to the car body and penetrates deep into the fissures and nooks. Thanks to this, we can remove preliminary impurities without manual contact, which protects the car body during further cleaning.

I-ACTIVATOR - highly concentrated active foam for pre-washing, that exhibit excellent emulsifying properties against stubborn dirt. Perfectly dissolves and lifts dirt from the surface of the car body, preparing the vehicle before further cleaning.

Recommended dilution: 1-4%

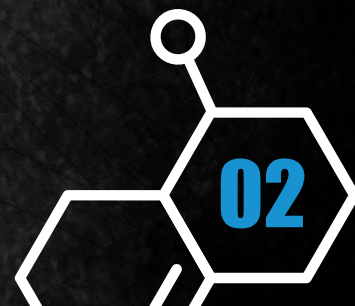

I-AFC - active foam for special tasks. The strong cleaning agents penetrate deeply into the dirt structure, dissolves and removes it from the surface of the vehicle. The product creates a dense, firmly sticking foam that ensures rapid action. The product can be used for thorough washing of cars, large-surface vehicles (trucks etc.), machines or trailers.

Recommended dilution: 1-3%

**USE ONLY WITH
PRESSURE CLEANERS!**

GENERAL WASHING

STRENGHT AND PERFORMANCE

General washing allows you to remove all mobile dirt left behind after prewashing with active foam. The composition of cleaners guarantees the dissolution of stubborn dirt, and at the same time does not affect the quality of the car paint. The concentrated composition ensures high efficiency and excellent value for money.

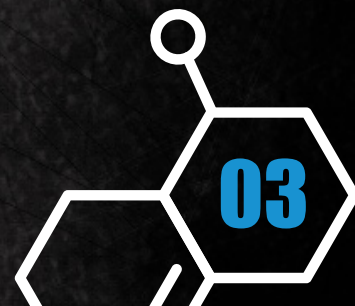

I-CS - efficient shampoo perfectly removes all impurities. The rich composition guarantees fast cleaning and reducing the formation of streaks. The shampoo is great foaming and has a pleasant fragrance, making working with it a pure pleasure. Product for use with brush.

Recommended dilution: 1-4%

I-DEG - highly concentrated product for thorough cleaning of rims. An alkaline formulation that perfectly cleans any kind of rims. The advanced composition guarantees effective removal of road dirt, emulsifies the stubborn stains and allows you to regain perfect cleanliness in every corner of the rim.

Recommended dilution: 10-20%

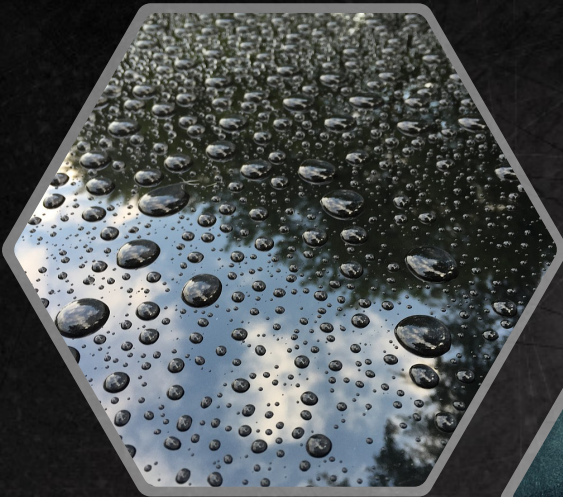

PROTECTION

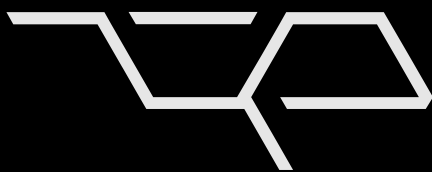

PERFECT APPEARANCE AND GLOSS

The last step during car washing is applying protective coatings. Their goal is to protect and shine the car's body. An effective formulation should guarantee perfect water beading, protect against harmful substances (bird droppings, acid rains, road salt) and significantly facilitate next cleaning. In addition, it should improve the texture of the bodywork and give it an excellent gloss. The achievements of chemistry have allowed us to obtain a product combining all these functions in one.

I-WAX - advanced hydrowax solution that exhibit three functions: drying, polishing and protecting the car body. It gives an immediate effect and is characterized by excellent performance. It exhibits full power even at high dilution.

Recommended dilution: 0.5-1%
